

Chad is Peter & Kimi's oldest son and Foreman / Estimator / Climber here at Brooks Tree Care. And, he's an all around great guy.

He started climbing everything before he started walking and as a kid spent more time outdoors than indoors.

He is an engineer in his bones and he built a 1974 BMW 2002 between the ages of 16-18, doing every bit of it himself, from re-building the engine to the final paint job. Chad still enjoys inventing & building things and has also re-built two boats in recent years. He often mills the wood from trees we've had to remove, into beautiful live edge tables, cutting boards & bowls.

Chad pursued his studies in Arboriculture while at Santa Barbara City College where he would free dive for lobster and fish to feed himself & his friends. He earned his Deep Sea Diving, Marine Technology degree and also became an EMT.

Chad is engaged to his lovely, longtime girlfriend, Mackenzi who runs her fathers business, Marin County Arborists. They've known each other since they were just wee ones. They enjoy fishing, hiking & traveling together and spending fun times with their many dear friends. We are all looking forward to that wedding someday!

They live in Strawberry with their two cats, Tako & Sake.
